

Hearing Protection

Protecting workers against hazardous noise helps reduce the risk of hearing loss. Bullard's NEW Ear Muffs are the perfect choice when working in hazardous noise environments.

Protection

- Ear Muffs meet OSHA's Noise Reduction Rating (NRR) requirement of 28dB for noise exposure.
- Ear Muffs completely cover ears to block harmful noise.
- Ideal for workers in high noise environments such as manufacturing, mining, oil and gas, or transportation.

Versatility

- Ear Muffs are slot-mounted to securely fit into Bullard's cap-style hard hats (C30, S51, S61, and S62) with accessory slots.
- Built-in accessory clips allow workers to wear Ear Muffs over the ears when needed or rotated to the back or front of the hard hat when hearing protection is not needed.

Comfort

- Lightweight.
- Equipped with soft foam cushion pads for all day comfort.
